

CANape Basics

Agenda VectorAcademy

Duration:	2 Days
Target Group:	CANape Users
Prerequisites:	None
Goal:	Usage of CANape as a tool for ECU measurement and calibration

1 | Introduction to CANape

- > Understanding run-time measurement and calibration
- > System overview
- > Project administration
- > Measurement

2 | Recording and Analyzing Data

- > Data recorders and data logging
- > Data analysis
- > Printing and reporting
- > Data mining

3 | Calibration and Diagnostics

- > Calibration
- > Parameter set files
- > Calibration data management
- > Diagnostic features

4 | Functions, Scripts, and Panels

- > Functions
- > Scripts
- > Advanced data mining
- > Panels
